A True Virtual Currency Project In The Cryptoworld By Destinewood Ltd

WHITEPAPER

Legal Disclaimer

It is important that you carefully read this legal disclaimer section. If you have any doubts, seek legal, financial, tax, or other competent law professionals' guidance. All of the information shown here is not intended to be exhaustive, and it should never be construed as part of any formal agreement.

We are confident that the material in this white paper is correct and current, and that all products, services, technical architecture, token distribution, and corporate schedules are correct and current.

No Advice:

Nobody is obligated by this white paper to sign a contract or make a legally enforceable commitment to donate. There is no advice in this white paper, and it cannot be used to sell or solicit Trillions' purchase of our token, nor can it be used to construct a contract or make an investment decision.

Limitation of liability

For any loss or harm originating from the use of this website's material, including written material, links to third-party sites, and data such as quotes and charts as well as buy/sell signals. iFortune will not be held responsible for any damages. Understand the risks and costs associated with trading assets on the financial market (digital or otherwise). ICOs, in particular, is one of the riskiest investment choices available to investors. Chances are you'll lose everything you've invested.

Investment risks:

Because of the high level of risk, cryptocurrency trading is unsuitable for all investors. Before trading cryptocurrencies, tokens, or any other digital asset, you should carefully examine your investment goals, level of experience, and risk appetite.

iFORTUNE & FORTUNE MACHINE

The **FORTUNE MACHINE** is a smartphone app that offers the staking and mining functionality, while **iFORTUNE** is a Bep20 token developed on the Binance smart chain.

iFORTUNE is a **BNB** blockchain-based ecosystem that also serves as a strong foundation for a myriad of decentralized infrastructures, consisting of investment solutions consisting of FORTUNE MACHINE (a mobile application) where people can mine and stake as well.

On the BNB blockchain network, iFORTUNE functions as a utility token as well as an asset token for this decentralized network.

This white paper describes a decentralized "**BNB**" (Mining and staking) smart contract address-based token in a reader-friendly manner. **iFORTUNE** is reshaping the entire ecology where users may trade digitally from anywhere in the globe for a cheap transaction cost that is almost free, allowing for a very liberating, strategic, low-risk, and frictionless trading experience in a fully decentralized manner.

This community-oriented money rewards its stakes and miners by redistributing it to others. As part of the decision-making process, community members are also included to give them a sense of ownership over their assets.

iFORTUNE has a total & limited supply of **40M** tokens!

Mission and Vision

iFORTUNE was conceptualized as a Smart technologies-anchored ecosystem aimed at solving the current problems associated with current conventional crypto trading & transaction processing services, including the delay in payment processing, fraudulent transactions, and expensive transaction costs. Further research into the Smart technologies escrows ecosystems revealed that current financial systems benefit from the Defi technology, which can solve the underlying challenges.

With the focus on building three primary functions as part of its Phase-1 deployment, **iFORTUNE** mission is to simplify the transaction process across the globe by offering an alternative to the **expensive middlemen** generally required in these specific types of transactions. The token will be used for discounts on services, dividends from staking, and as a governance token allowing the community to vote on how foundation funds are spent.

Our **mission** is to:

- To enable retailers to accept digital assets for goods and services
- To enhance the utility of iFortune coin in different projects
- To make Blockchain technology and **cryptocurrency accessible** by the masses, even if the majority don't know how it works
- To ensure users own personal data, which will significantly reduce the current data leaks via **centralized financial** systems
- Operate as a **community-focused** and community-driven digital asset, fully decentralized in every sense of the word.
- To create an ecosystem where different solutions can emerge from a social perspective, including collaborative applications.

How to buy iFORTUNE?

You need **Metamask** or **Trustwallet**

You can buy from decentralized Pancake swap and Latoken exchange

Global System and Secure

An efficient global system covering all corners provides the best data security.

Easy Token Integration

It provides perfect integration to all Wallets, Exchanges, DEXs, and DeFi in its entirety.

- We facilitate the transaction and bring them closer to a wider audience. An added benefit of use is that it's completely decentralized, so trading can be done freely across borders.
- This also has a huge effect on international payment fees. Traditionally international transfers have much higher fees than domestic transfers and payments. International payments and transfers with crypto are the same as domestic.
- So we are here to help you with everything you need.

ECOSYSTEM & EMPLOYMENT OPPORTUNITY

Live Projects

Staking and mining "iFortune Token" is advantageous in the crypto world as it generates rewards by staking it and mining generates passive income by the value of the collection as a whole increasing. When a user stakes an **"iFortune Token"** by **Fortune Machine** they can easily get their reward. It is also the easiest method to earn passive income in a decentralized world as its value increases for its stakes.

There are a few quantifiable **benefits** associated with us as follows:

- The cryptographic currency market has achieved a great leap in 2017. Then in 2018, the market price fell sharply.
- Nevertheless, governments around the world and industry associations have established a system for establishing laws for the spread of cryptographic currencies and establishing service networks during that time.
- Worldwide, currently, there are over 4000 cryptographic currencies ATMs, and various services can receive nearly 142,000 services.
- We are providing you with the staking and mining platform in the form of a **FORTUNE MACHINE**.
